B.Tech CSE Student | Web Developer Enthusiast | IoT & Robotics Prototyper

PROFESSIONAL SUMMARY

Computer Science Engineering graduate (2026) with a strong foundation in embedded systems, IoT prototyping, and AI/ML applications. Experienced in developing hardware-software integrated systems, managing sensor data pipelines, and implementing data-driven automation. Proven track record in technical mentorship, delivering workshops, and participating in engineering hackathons. Highly skilled in technical documentation and product demonstrations, aiming to leverage hands-on prototyping and presentation abilities to deploy impactful STEM education solutions.

EDUCATION

- **NITRA Technical Campus, Ghaziabad (AKTU)** Nov 2022 – May 2026
B.Tech in Computer Science Engineering | CGPA: 7.90
- **Parmeshwari Devi Dhanuka Saraswati Vidya Mandir** 2021 – 2022
Senior Secondary (CBSE) | 72%
- **Parmeshwari Devi Dhanuka Saraswati Vidya Mandir** 2019 – 2020
Secondary (CBSE) | 90%

EXPERIENCE

- **Innobyte Services – Web & Software Developer Intern** Nov 2025
 - Developed and optimized frontend interfaces using React.js to serve data-driven, cloud-connected hardware systems.
 - Integrated client-side dashboards with Express.js backend APIs to streamline real-time sensor data flow and telemetry metrics.
 - Prepared comprehensive technical documentation and project presentation workflows for cross-functional agile teams.

PROJECTS

- **Smart IoT Travel Tracker & Destination Vault** | Python Flask, MongoDB, ESP32, REST APIs
 - Built a full-stack IoT platform using Python Flask to ingest, store, and process location-based telemetry.
 - Designed REST API integrations to sync and analyze real-time GPS/sensor metrics for hardware tracking systems.
 - Structured scalable MongoDB schemas to handle high-frequency incoming data streams from microcontrollers.
- **Predictive Stress Level & Physiological Data Modeler** | Python, Scikit-learn, Embedded Telemetry
 - Developed an end-to-end processing pipeline to clean and extract insights from physiological sensor data streams.
 - Trained classification models using Scikit-learn to analyze real-world telemetry and predict stress variations.
 - Serialized lightweight inference algorithms via Joblib optimized for real-time edge devices and microcontrollers.
- **Sangeet Samarpan Campus Portal & Club Hub** | JavaScript (ES6+), UI Design, Git
 - Programmed an interactive application to support data collection, engagement analytics, and user onboarding.
 - Led product demonstrations, cross-team performance testing, and automated deployment sequences.
 - Collaborated on shared codebases and managed version control workflows using Git and GitHub.

TECHNICAL SKILLS

Embedded Systems & IoT: Arduino IDE, ESP32, MicroPython, Tinkercad, Sensors & Actuators, Prototyping
Programming Languages: Arduino C/C++, Python, JavaScript (ES6+), SQL, MS Office Suite (Excel, PPT)
Data, AI & Robotics: Scikit-learn, Data Preprocessing, Feature Engineering, Computer Vision (OpenCV concepts)
Backend & Formats: Python Flask, Node.js, Express.js, REST APIs, JSON, Data Logging
Databases & Cloud: MongoDB, MySQL, Firebase, Google Cloud Fundamentals
Tools Platforms: Git, GitHub, Postman, VS Code, Jupyter Notebook

CERTIFICATIONS

- **Project Engineer 5G Network** – Telecom Sector Skill Council (TSSC)
- **Artificial Intelligence A-Z 2023** – Udemy (Neural Networks & Core ML Models)
- **Full-Stack Web Development & Python Certifications** – Internshala Trainings
- **Generative AI Fluency** – NASSCOM & FutureSkills Prime
- **Google Cloud Skill Badges** – IAM, BigQuery, Infrastructure Basics

ACHIEVEMENTS & MENTORSHIP

- **Hackathon Competitor & Innovator:** Actively participated in campus innovation hackathons, including the Coding Extravaganza at NITRA Technical Campus, designing hardware-software integrated prototypes.
- **Technical Mentor & Trainer:** Conducted peer-led training workshops to guide junior students in debugging code, building electronics circuitry, and understanding data flow concepts.
- **Problem Solver:** Solved 100+ algorithmic and data structures problems on LeetCode using Python and JavaScript, strengthening computational logic required for robust system engineering and R&D.

SOFT SKILLS

Technical Mentorship • Project Presentation & Demos • Documentation Reporting • Workshop Curriculum Design • Analytical Problem Solving • Agile Team Collaboration
