B.Tech CSE Student | Data Analyst | Integration API Enthusiast

PROFESSIONAL SUMMARY

Data Analyst and Computer Science Engineering graduate with experience in data analysis, machine learning, SQL, Python, and database management. Skilled in extracting, cleaning, and analyzing large datasets to generate actionable business insights. Proficient in Pandas, NumPy, Scikit-learn, SQL, Excel, and data visualization techniques. Passionate about transforming raw data into meaningful information that supports strategic decision-making.

EDUCATION

- NITRA Technical Campus, Ghaziabad** Nov 2022 – Present
B.Tech in Computer Science Engineering | CGPA: 7.90
- Parmeshwari Devi Dhanuka Saraswati Vidya Mandir** 2021 – 2022
Senior Secondary (CBSE) | 72%
- Parmeshwari Devi Dhanuka Saraswati Vidya Mandir** 2019 – 2020
Secondary (CBSE) | 90%

EXPERIENCE

- Innobyte Services – Web Developer Intern** Nov 2025
 - Redesigned King Sukh Guest House website using React JS and Tailwind CSS improving UI responsiveness.
 - Integrated frontend with Express.js backend APIs for seamless communication and performance optimization.
 - Improved cross-device compatibility and navigation experience across desktop and mobile platforms.

PROJECTS

- Mental Health And Stress Level Prediction Model** | Python, Scikit-learn, Pandas, NumPy, Streamlit
 - Integrated multimodal data streams including HRV from wearables, sleep cycles, and physical activity to create a digital biomarker profile.
 - Developed supervised learning models to identify behavioral deviations and classify stress levels for early intervention.
 - Implemented sentiment and linguistic analysis on user journals to detect anxiety and depressive indicators using text-processing techniques.
 - Built an interactive Streamlit interface for real-time stress prediction and visualization.
- Airbnb-listing-NYC-main** | Python, SQL, Pandas, NumPy, Jupyter Notebook
 - Analyzed 48,000+ Airbnb listings in New York City to identify pricing trends, neighborhood performance, and host behavior patterns.
 - Performed data cleaning, preprocessing, and exploratory data analysis (EDA) using Pandas and NumPy.
 - Developed SQL queries to extract business insights related to room types, availability, reviews, and revenue opportunities.
 - Generated data-driven recommendations for hosts and stakeholders to optimize pricing strategies and improve listing performance.
- Cryptocurrency Market Data Analysis** | Python, Pandas, NumPy, Jupyter Notebook
 - Analyzed cryptocurrency market datasets to identify trends in price movements, market capitalization, and trading activity.
 - Performed data cleaning, preprocessing, and exploratory data analysis (EDA) using Pandas and NumPy.
 - Examined historical Bitcoin and cryptocurrency pricing data to uncover patterns and market behavior.
 - Utilized Jupyter Notebook for data exploration, analysis, and reporting of cryptocurrency market trends.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, SQL,
Data Analysis: Pandas, NumPy, Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA)
Machine Learning: Scikit-learn, Classification, Regression, Model Evaluation
Data Visualization: Matplotlib, Seaborn, Streamlit, Power BI
Databases: MySQL, MongoDB, Firebase Realtime Database
Tools: Excel, GitHub, VS Code, Jupyter Notebook, Google Cloud Platform **Core Concepts:** Statistics, Probability, DBMS, Data Structures Algorithms, Data Mining

CERTIFICATIONS

- Artificial Intelligence A-Z 2023 – Udemy
- Project Engineer 5G Network (TSSC)
- Generative AI Fluency. (NASSCOM, Futureskillsprime)
- Google Cloud Skill Badges (IAM, BigQuery, Kubernetes)

ACHIEVEMENTS

- Solved 100+ DSA problems on LeetCode focusing on analytical and problem-solving skills.
- Earned multiple Google Cloud Skill Badges in IAM, BigQuery, and Kubernetes.
- Participated in collaborative hackathons and software development competitions.

SOFT SKILLS

Problem Solving • Analytical Thinking • Communication • Team Collaboration • Adaptability • Quick Learning
